

Hampton Coffee Company® selects only the finest estate-grown Arabica coffee beans from the world's green coffee markets and hand-roasts them daily at our Company Roastery. We package our coffee beans in special bags to maintain freshness and ship directly from our Roastery on the same day, so the coffee you receive is guaranteed to be at its peak of freshness. You will find we do all this at very competitive prices.

Hampton Coffee Company®'s longtime reputation is built upon the quality and freshness of our fine coffees. However, our customized sales and personal service is just as important to our success. We encourage our customers to create their own custom blends which we will roast to order and private label. In addition, for our wholesale clients, we sell and install commercial coffee and espresso equipment which can be used to display, grind, and brew our freshly roasted coffee. We will spend the time to educate you and your staff about these fine coffees and how to get the most from their inherently rich flavors. We treat each of our customers as our number one priority.

You are invited to visit our Company Roastery, located on Montauk Highway in The Hamptons, at our flagship Espresso Bar & Café. Watch us roast while you enjoy our fine coffee and espresso. Then bring home your favorite blend or varietal to enjoy with some of our freshly baked savories!

HAMPTON COFFEE COMPANY

HAND-ROASTED ESTATE-GROWN COFFEE...A HAMPTONS CLASSIC SINCE 1994

HIGHEST QUALITY COFFEE The quality of the green coffee bean is a critical ingredient to the taste of the final product. Coffee is a product of how it is grown. Soil conditions, elevation, and climate determine the coffee beans' final flavor. At Hampton Coffee Company,[®] we begin with 100% top-grade Arabica Beans from the finest plantations around the world. These are the most flavorful coffees because they are grown at a higher altitude where crops grow smaller and more slowly, giving the coffee a more concentrated flavor and aroma.

SMALL-BATCH, ARTISANAL ROASTING Our Roastmaster roasts our fine coffee by hand in small batches so that each coffee varietal can be individually treated to raise its own unique flavor characteristics. Our coffee is roasted a bit darker than most coffees here on the East Coast, but not too dark, so that the full flavor potential is realized and that bitter taste is avoided.

A WORD ABOUT OUR COFFEE'S FRESHNESS Since we are a local operation and roast coffee daily to meet our stores' requirements and the needs of the dozens of East End and New York City restaurants that proudly serve our coffee, we do not need to use vacuum-packed bags employed by others with less frequent roasting schedules. Nor do we warehouse our coffee. It is delivered roaster-fresh to our retail and wholesale customers. That is why we recommend that you purchase your coffee weekly and grind it yourself just before brewing. To preserve freshness, store coffee in a small airtight container. We do not recommend refrigerating or freezing your coffee.
